

T.K. Halli Industrial Visit

An Industrial visit to the T K Halli water treatment plant was made on May 16, 2018. This water treatment plant is one of the major purification units for the drinking water supply to the city of Bangalore. The Industrial trip dealt with the major concepts taught in the curriculum related to the science of environmental engineering. The batch of 3rd year students were taken to the visit along with faculty dealing with the topics related to the trip. The trip was a major success as it gave them insight into the responsibilities as a civil engineer which they would have to perform as they finish their course.

[Faculty and students at the start of the journey from the college taking about two hours to reach the destination.]

[The highly sophisticated water treatment facility at the T K Halli water treatment plant]

[The Entrance of the water treatment plant, the facility maintains strict regulation on personnel safety in the campus, hence the waiting where after thorough inspection clearance is given to proceed inside.]
